

Commercial Law

We're here to strengthen
your business.

At Swinburne Maddison, our Commercial Law team delivers clear, strategic advice to help businesses thrive. Whether you're launching a new venture or managing complex operations, we provide tailored legal support that protects your interests and drives growth.

We work across a wide range of sectors, advising on everything from watertight contracts and digital compliance to intellectual property, consumer contracting and public procurement.

Our collaborative approach means we take the time to understand your business, ensuring our advice is not only legally sound but commercially effective.

Our services are tailored to meet your needs, including:

- Commercial Contracts
- IT Agreements
- Data Protection
- Intellectual Property
- Public Procurement

Your commercial
interests protected
with confidence.

We provide clear, strategic guidance to
safeguard your commercial assets and
keep your business moving forward.

Contracts for successful business

Your business relationships are only as strong as the contracts that bind them.

We draft, review and negotiate commercial contracts that are transparent, enforceable and aligned with your business goals. We prepare clear, effective agreements tailored to your needs, ensuring your terms work in the real world, not just on paper.

Working closely with our corporate team, we take time to understand your operations, risks and objectives. From terms and conditions to complex services agreements, we ensure your contracts are robust and provide optimal protection.

Public Procurement

Whether you're supplying the public sector or a public body purchasing goods, services or works, we help you to comply with the requirements of public procurement legislation and ensure the resulting contract reflects the contracting authority's requirements and the successful bidder's tender.

We also help with modifications to existing contracts awarded through a procurement exercise, whether due to a change in the parties or due to a variation to the specification or method of delivery.

Digital Expertise

In a fast-moving digital world, we help you stay compliant and competitive. Our team advises on IT agreements, cloud services, software development and UK GDPR compliance.

From launching a new platform or managing data flows, we provide practical, up-to-date legal support to protect your digital assets and customer trust.

Protecting Your Ideas

Your intellectual property is a core business asset. We help you protect it through confidentiality agreements and to commercialise it through licensing and assignments.

Whether it's branding, software or creative content, we ensure your rights are secured and your ideas are used on your terms, giving you reassurance in every transaction.
